

Pindler is proud to offer Alta, a textile performance technology that can be applied to Pindler Fabrics.

## why alta?

Alta is the latest technology created by Applied Textiles, Inc. and enables virtually any textile to withstand the rigors of real life without leaving a mark. Alta offers superior resistance & repellency to oil and water-based stains, is easy to clean and can enhance physical properties for a wide array of natural and synthetic fibers. The technology is permanent and imperceptible to the eye and hand. Alta is precision-engineered for end-use textile applications including relevant fire code compliance.

**To Clean:** Blot with a dry towel. If residue remains, flush with warm water. Learn more at [applied-textiles.com](http://applied-textiles.com).

# features & benefits

---

Alta is a **water-based** technology that imparts permanent repellency to virtually any kind of fabric without impacting its softness or breathability.

- ✔ Forms molecular bond to fibers and will **not** migrate or “off-gas.”
- ✔ High repellency to stains and spills.
- ✔ Exceptional cleanability, reducing the need for chemical cleaning agents.
- ✔ Passes European Union REACH standards and Prop 65 (California, United States).
- ✔ Free from any solvents or VOCs (volatile organic compounds), PFOS, PFOA, formaldehyde, heavy metals or phthalates.
- ✔ Non-allergenic and safe to be next to the skin; core technology similar to “performance fabric” used for leading apparel and sportswear.
- ✔ Odorless and completely imperceptible to the eye and hand.

## cleaning & care guidelines

Fabrics treated with Alta are exceptionally easy to clean and maintain.

### **1. Liquid spills:** Don't wait!

Blot liquid quickly and gently with a clean, dry, absorbent cloth. If liquid remains, continue with gentle blotting. Gently remove any soil or debris from the surface.

No rinsing needed.

### **2. If any residual spot remains:** Flush liberally with warm water and blot with a clean, dry, absorbent cloth. Change blotting cloth surface frequently, until spot is gone. (Avoid brushing which can spread the stain!) Repeat process until spot has been removed. Finish with final warm water rinse and blot.

### **3. For difficult or stubborn stains:** Mix 2-3 drops of any mild laundry detergent with 1 cup of water and apply to soiled area. Gently work solution into the area, wait several seconds and blot the spot with a clean, dry, absorbent cloth. Repeat until spot has been completely removed. Rinse thoroughly with warm water and blot to remove any soap residue. (Be thorough here: soap not rinsed away in the fabric can cause a recurring stain!)
