

Silicone Vinyl Care and Cleaning

Silicone Vinyl is a completely new type of coated fabric that is made from 100% silicone with a 100% polyester double-knit backing, allowing better recover and 4-way stretch for easier upholstery. Silicone is approved for both indoor and outdoor use. It has a supremely leather-like soft hand with a subtle surface drag.

Day-to-Day Cleaning — Remove ordinary dirt and smudges with mild soap and water. A 5:1 ratio of water to bleach solution may be used as a disinfectant. Rinse the surface with clean water after disinfecting. Dry with a soft, lint-free cloth or towel.

Stain Removal — Silicone fabric is resistant to most common stains. To keep furniture looking new, stains such as ballpoint pen can be dry-erased with a clean, lint-free cloth. Gently rub the area until the stain has been removed. Wet or goeey stains such as food stains (e.g., ketchup or jelly) or topical stains (e.g., antiseptics, lotions and cream) wipe first with a clean cloth or sponge, and then follow the instructions above.

Stubborn Stains — If a ghost stain remains, apply a small amount of household rubbing alcohol (isopropyl alcohol) to a clean, lint-free cloth and rub the stain until it has been removed. Rinse with a clean, damp cloth.
